

4x4 3G-SDI Switcher & Splitter - ID# 898

Operation Manual

Introduction

The 3G-SDI 4 by 4 Switcher allows SD-SDI, HD-SDI and 3G-SDI signals to be shown on SDI display while ensuring high bit rates of 2.970 Gbit/s to give you fast signal transmission without signal loss. For professionals this means that it is now easier to switch four 3G-SDI signals and split it up to four SDI signal outputs.

Features

- Four 3G-SDI input sources can selected as the source and split to four 3G-SDI displays simultaneously
- Operation at 2.970Gb/s, 2.970/1.001Gb/s, 1.485Gb/s, 1.485/1.001Gb/s and 270Mb/s
- Supports SMPTE 425M (Level A and Level B), SMPTE 424M, SMPTE 292M, SMPTE 259M-C
- Provides the Equalized and re-clocked transmission
- Control by RS-232, IR Remote and on panel buttons
- Supports signal input and output distance of up to 300M for SD signals, 200M for HD signals and 100M for 3G signals.

Note: Cable tested with Belden 1694A. Operating distances may vary if used with another type of cable.

Applications

- Video broadcasting display
- Professional video program display
- Film studios program monitoring
- Video program switching display

System Requirements

Input connects with SDI sources and output connects with SDI displays, all input/output with SDI cables.

Operation Controls and Functions

Front Panel

- ① **Power LED:** This green LED will illuminate when the device is connected with power supply.
- ② **IR receiver:** This IR window receives IR signal from the remote control included in the package.
- ③ **3G-SDI Input select/Indicator 1~4:** Press the input button sequentially to switch to your desired SDI input source, the LED will illuminate to indicate which input source is selected.
- ④ **SDI OUTPUT:** These slots are to connect to the SDI displays with an SDI cables for displaying images. Or it can be connect with another SDI converter/extender to extend the signal.

Rear Panel

- ① **SDI INPUT:** These slots are to connect to the SDI source equipments such as video camcorder or SDI player.
- ② **RS-232:** Connect with D-Sub 9pin cable from the PC/NB for RS-232 control.
- ③ **DC 5V:** Plug the 5V DC power supply into the unit and connect the adaptor to AC wall outlet. Green LED will illuminate when the power is connected.
