

Analog L/R Stereo In-Out Lip Sync Corrector - ID# 15574

Operation Manual

Introduction

The L/R In-Out Lip SYNC Corrector is a compact device that corrects audio delays between audio and video. When distributing video over long distances through multiple devices like distribution amplifiers and set top boxes there can sometimes be a noticeable delay which results in audio being played before the video. This device lets you manually adjust the audio delay from 0 ~300 ms so you can perfectly synchronize your audio and video, so when it reaches the display your media is synced and ready to go. The Lip SYNC Corrector is an affordable and compact device that when placed beside your display greatly enhances your home audio experience.

Applications

- Home Theater
- Cable TV
